

As a foundation product of APTUS' premium collection, Startboost is a highly concentrated, all natural root and growth booster that provides organic nitrogen (from left turning amino acids) and humic substances

Improves development of roots, stems and plant tissue

High concentrations of organic carbon-chain complexes

Beneficial agent for propagation

Full spectrum L-amino acids

Natural chelator of elements present in the planting medium

Increases uptake and transport of nutritional elements

Stimulates healthy bacteria populations

Provider of organic nitrogen

Highly concentrated

Powerful inoculant

This all natural nitrogen and humic booster promotes increased transport of nutritional elements across plant cell membranes, whilst reducing levels of toxic elements in the growing media.
