

HYDROPONIC REGULATOR

Part No: RI1RCDFGSV

This compact regulator is specifically designed for Hydroponic dispensing systems using CO₂. A safety relief valve is fitted to the downstream low pressure side, has high pressure gauge and flow gauge in L/min and in addition the outlet has a 6 - 12 mm hose barb.

All marking are permanently engraved into the body.

SPECIFICATIONS

Materials of constructions	
Body	Machined chrome
Pressure gauges	Plated brass
Diaphragm	Powder coated steel
Seat	Encapsulated PTFE
Gas service	CO ₂
Performance	
Max. working pressure	20,000 kPa
Outlet	0 - 630 Lpm
Operating temperatures	-20°C to +50°C
Weight	1.02 kg
Dimension	(W) 115 x (H) 200 x (D) 155 mm
Markings	Gas service Maximum working pressure Outlet flow AS 4267 Date of manufacture (code) Ports marked HP/LP
Warranty	1 Year (manufacturers defect)
Country of origin	Italy

Meets AS 4267
